

Super Drive is a highly effective solution for plant development and it can be used in all stages of growth, from seedling to harvest.

It is effective in the reduction of stress and the maximisation of performance. It can be applied through the roots or through the leaves and can be added to nutrient solutions throughout the life of the plant.

Super Drive

for specimen plants and crucial crops

SuperDrive

- SuperDrive is manufactured from pure and highly concentrated plant extracts. A little goes a very long way.
- It contains powerful plant enhancing compounds, derived from the concentrated extracts of marine plants.
- It is non-toxic and poses no environmental hazards.
- It can help to produce healthier more vigorous plants, with brighter, more fragrant flowers.

Empowers peak plant performance

- SuperDrive can be used in all stages of growth from seed to harvest.
- SuperDrive can be diluted in water or added to nutrient solutions.
- SuperDrive is super concentrated – one litre can treat up to 1,000 litres of water or nutrient solution.
- SuperDrive can be supplied through the roots or misted on to the foliage.

SuperDrive is available in:
100 ml 300 ml 500 ml 1 litre
